

Dear Farm Animal Proteomics Colleague,

Could you bring the following to the attention of current and recently graduated students in relevant fields of animal, veterinary and computational science:

Applications are invited for 11 PhD positions (Early Stage Researchers) to be funded by the European Commission's Horizon 2020 Marie Skłodowska-Curie Innovative Training Network (ITN) "MANNA : The European Joint Doctorate in Molecular Animal Nutrition".

MANNA is a consortium of high profile universities, research institutions and companies located in Belgium, Croatia, France, Germany, Italy, Slovak Republic, Spain and the United Kingdom.

The projects are to evaluate the influence of innovative feed additives on animal production using advanced OMIC technologies.

Further information and applications at <http://www.phd4MANNA.eu/>

Best wishes,

David Eckersall

Coordinator COST Action Farm Animal Proteomics (2011-14)
